Safety

Welcome to Plum Safety

We are international experts and offer high quality products and expert knowledge within first aid solutions and hygiene for the workplace.

We want you to be safe at work!

WORKPLACE HYGIENE & FIRST AID

Accidents happen every day. Minimize the extent and impact by making sure you have the right first aid solutions available where accidents can happen.

A first aid solution tailored to your workplace will help you prepare for accidents and quickly treat eye injuries, cuts and minor wounds in a safe and hygienic way.

A wide range of eyewash, plasters, decontamination solutions, burn gel, and wound cleansing wipes, helps to quickly treat you or your colleague and minimize the damage of an accident.

It is essential that the mix of safety products is fitted to the requirements of your workplace.

GLOBAL FOOTPRINT

We have a global footprint and are represented in most of the world. Reach out if you need us to help you find your safety supplier!

Protect your people Equip your facility right

Quick and easy access to first aid will limit the impact of accidents and keep your workplace safe

Accidents happen every day. Minimize the extent and impact by making sure you have the right first aid solutions available where accidents can happen. A first aid solution tailored to your workplace will help you prepare for accidents and quickly treat eye injuries, cuts and minor wounds in a safe and hygienic way.

QUICK AND EFFECTIVE HELP TAILORED TO YOUR BUSINESS

A wide range of eyewash, plasters, burn gel and wound cleansing wipes, helps to quickly treat you or your colleague and minimize the damage of an accident. It is essential that the mix of safety products is fitted to the requirements of your workplace.

We will help you find the right solution, whether you work in an office or handle acids or alkali in a high-risk environment like charging batteries, industrial cleaning, laboratory work or petrochemical industry.

PRACTICAL SOLUTIONS FOR BUSY WORKING DAYS

Your hands, your eyes and your head are your most important working tools. Even a small incident can affect your work, and larger ones may cause an even greater impact if you are not prepared. By taking the correct precautions, you enable yourself to have the right first aid within reach, whereby many smaller everyday accidents can be minimized significantly.

Our eyewash is easy to use if an accident happens

Turn the eyecup in the direction of the arrow 360° until the seal breaks

Lean back, squeeze the bottle gently and rinse

Or lean forward and rinse by squeezing the bottle gently

Free account. Unlimited products. Auto notifications. Log inspections.

SIMPLE & EFFICIENT TOOL FOR MANAGEMENT OF EXPIRY DATES

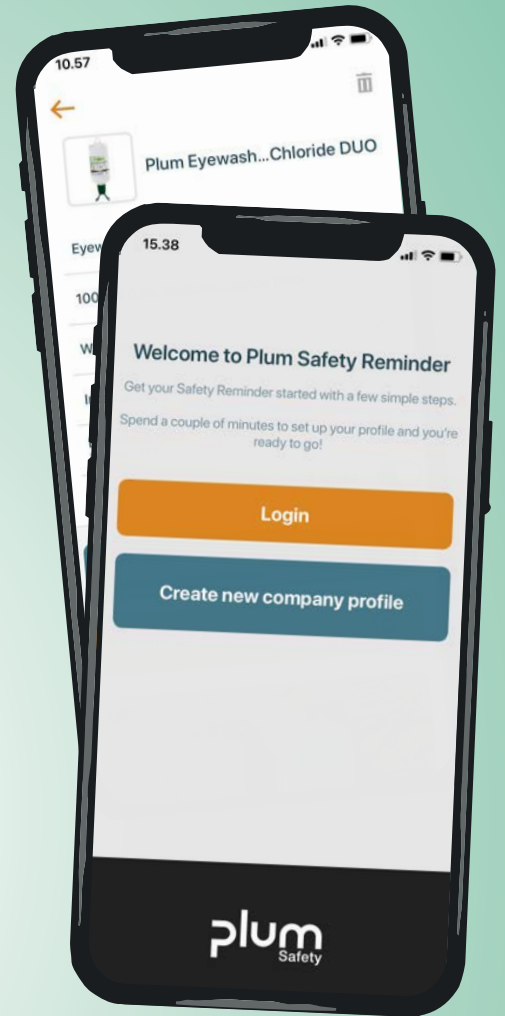

Help your customer and position yourself as dealer in the app Plum Safety Reminder - a free tool for efficient management of expiry dates

Developed to make life easier for employees responsible for safety products by offering a complete product overview and automatic email alerts.

FEATURES

- ✓ Free account
- ✓ Simple management of expiration dates and product usage report
- ✓ Automatic email alerts
- ✓ Manage multiple locations
- ✓ ... and multiple dealers
- ✓ Scan products to load information
- ✓ Log function for inspections

How to choose the correct eyewash

When it comes to eye accidents, the harmful substance varies and you need to choose the right eyewash accordingly

The cause of an accident determines which eyewash is required. When an accident occurs, it is essential to determine whether it is caused by either a foreign object or by acids or alkali - and if possible, which pH value the substance in question holds.

Know your chemicals and ensure the best suited first aid.

An eyewash plan helps you choose the right eyewash by clear guidelines. Place the eyewash plan next to the eyewash stations, boxes and QuickSafe®.

How to choose the correct eyewash and use it with an eyecup

How to choose the correct eyewash and use it with a DUO eyecup

Art.no. 956480B

Dimensions: W: 22,8 x H: 29,0 cm

The pH scale ranges from 0 to 14 and measures how acidic or alkalic a substance is.

- A pH of 7 is neutral
- A pH less than 7 is acidic
- A pH greater than 7 is alkalic

When pH is either strongly acidic or alkalic, start by rinsing with Plum Eyewash pH Neutral 4.9% Phosphate until the bottle is empty. Discard the bottle and rinse with Plum Eyewash 0.9% Sodium Chloride until you reach a doctor or the emergency room.

When pH is neutral, rinse with Plum Eyewash 0.9% Sodium Chloride until the bottle is empty and discard the bottle after use.

Mount the eyewash plan on the wall
next to the eyewash station. Mark off
145 cm from the floor and place the
eyewash plan according to the mark.

Rinse both eyes simultaneously

You no longer have to choose which eye to save. Plum DUO eyecup is a unique solution and allows you to rinse both eyes at the same time and save them both

MANY ACCIDENTS AFFECT BOTH EYES

Eye accidents involving chemicals often affect both eyes. A DUO eyecup helps you prepare, because it allows rinsing of both eyes at the same time. Stop worrying about which eye to save, save them both at once instead.

EYECUP FOR OPTIMAL RINSING

Apart from the strength of the acid or alkali, the contact time is the most critical factor in accidents involving acids and alkali. It is key that the available first aid neutralize the harmful substance as quickly as possible. With the unique DUO eyecup, you can treat both eyes at the same time.

The eyecup is shaped to help you keep your eyes open during rinsing and ensure the correct flow of liquid and rinsing time.

Plum Eyewash 0.9% Sodium Chloride and Plum Eyewash pH Neutral 4.9% Phosphate are disposable products, which ensure that the rinsing liquid is sterile every time

Eyewash in case of foreign objects

Plum Eyewash 0.9% Sodium Chloride Solution ease discomfort and prevents following complications caused by foreign bodies in the eyes

You can easily get a foreign object in your eye. Dirt, dust, or paint from your hands all pose a risk for your eyes. The risk increases when working with machines and tools that can cause wood or metal splinters in your eyes.

Getting a foreign body in your eye can be extremely unpleasant, as the eye is highly sensitive. Without treatment, it can develop into an inflammation of the eye, cornea or iris. By rinsing immediately after the incident, you can prevent this and decrease the risk of following complications.

This eyewash contains a sterile saline solution of 0.9% sodium chloride, which is similar to the eye's natural fluid. Squeeze the bottle gently to generate a soft and pleasant flow. The eyewash product range includes everything from a small handy bottle that you can carry with you, to wall-mounted stations that makes it quick and easy to get help in case of an emergency.

200 ML / 500 ML / 1000 ML PLUM EYEWASH 0.9% SODIUM CHLORIDE

The bottles contain a sterile solution and can be used individually or as refills in eyewash stations and boxes. They come with a dust cap. The 200 ml bottle is easy to store in the specially designed belt bag, in the first aid kit, in the toolbox, etc.

3 X 500 ML PLUM EYEWASH 0.9% SODIUM CHLORIDE - ON-THE-GO

Practical and handy set with 3 bottles of eyewash. Easy to take with you in the car or on the way to a doctor or the emergency room.

Content:	3 x 500 ml
Packaging:	4 x 3 x 500 ml
Article no:	4620

Eyewash in case of chemical accidents

Plum Eyewash pH Neu-
tral 4.9% Phosphate
neutralizes acids and
alkali and quickly flush
them from the eye
during rinsing

IMPORTANT

Reservation is made for hydro-
fluoric acid, which is toxic and
highly corrosive to eyes, skin,
and bones. Plum Eyewash pH
Neutral 4.9% Phosphate is not
intended as first aid for eye
accidents involving hydrofluoric
acid, because it does not limit
the corrosive effect of HF.

RECOMMENDED USE OF PLUM EYEWASH PH NEU- TRAL 4.9% PHOSPHATE

This eyewash solution is for acci-
dents involving acids and alkali.
Rinse with Plum Eyewash pH
Neutral 4.9% Phosphate to neu-
tralize the pH value of the harmful
substance to a harmless level as
quickly as possible.
Continue rinsing with Plum Eyewash
0.9% Sodium Chloride until you
reach a doctor or emergency room.

DANGEROUS CHEMICALS ARE EVERYWHERE

In many jobs, businesses and industries, there is a risk of being exposed to serious eye injuries caused by chemicals e.g. in chemical factories, the recycling industry, on construction sites and in the mining industry. You need a neutralizing eyewash to minimize the impact of the accident.

Acids and alkali can break down the structure of skin and mucosa membranes. The severity of corrosion injuries depends primarily on:

- The concentration of the chemical - Strong acids and alkali are extremely corrosive
- The temperature - A high temperature increases the corrosive properties of the chemical
- The duration of contact - The longer the duration, the deeper the harmful substance will penetrate

A FEW SECONDS CAN MAKE THE DIFFERENCE

In case of eye injuries involving acids and alkali, it is crucial to neutralize the chemical as quickly as possible to a pH level of approximately 7.4, corresponding to the normal pH level of the eye's fluid - before the acid or alkali has penetrated the cornea.

To optimize safety where there is a risk of acid and alkali injuries, the eyewash solution must be:

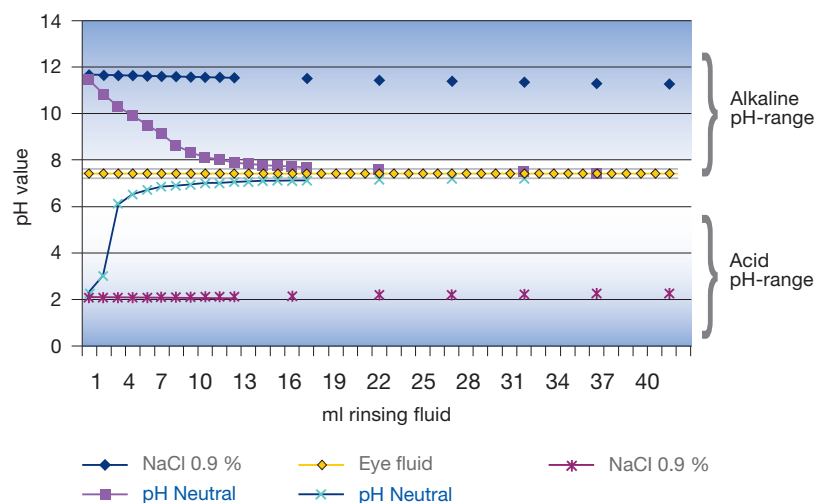

- Easily accessible
- Quick to use
- Effective

QUICK AND EFFECTIVE EYEWASH IS THE KEY

Plum Eyewash pH Neutral 4.9% phosphate is a buffer which quickly and effectively neutralizes even strong acids and alkali. The liquid consists of phosphate salts that are present in the body. The hydrogen phosphate buffer is effective against acids, whereas the dihydrogen phosphate buffer reacts against alkali. The effect of Plum Eyewash pH Neutral 4.9% Phosphate has been documented in scientific studies.^{1) 2)}

We have tested the neutralizing effect of Plum Eyewash pH Neutral 4.9% Phosphate for both strong acids and alkali compared with the effect of saline eyewash with 0.9% sodium chloride. The test clearly shows that Plum Eyewash pH Neutral 4.9% Phosphate quickly neutralizes both acids and alkali to a harmless pH level. Saline eyewash dilutes the liquid, but only small changes to the pH value are obtained (Figure 1).

Figure 1: Neutralizing effect of Plum Eyewash pH Neutral 4.9% Phosphate and 0.9% sodium chloride

**200 ML - SINGLE CARTON
- PLUM EYEWASH PH NEU-
TRAL 4.9% PHOSPHATE**

Bottles with a 4.9% sterile phosphate buffer solution that quickly neutralizes acids and alkali. They can be used individually or as refills in eyewash stations and boxes.

The carton protects the bottle and is suitable for re-filling stations and for mobile workplaces.

Content: 200 ml
Packaging: 10 x 200 ml
Article no: 4755

**200 ML
PLUM EYEWASH PH NEU-
TRAL 4.9% PHOSPHATE**

The 200 ml bottle is easy to carry in the specially designed belt bag, in the first aid box, in the toolbox, etc. Delivered with dust cap.

Content: 200 ml
Packaging: 10 x 200 ml
Article no: 4752

**500 ML
PLUM EYEWASH PH NEU-
TRAL 4.9% PHOSPHATE
DUO**

The 500 ml bottle comes with the ergonomic DUO eyecup making it possible to rinse both eyes at the same time.

Content: 500 ml
Packaging: 6 x 500 ml
Article no: 4801

**PLUM BELT BAG
FOR 200 ML BOTTLES**

Carry your eyewash in this practical bag for your belt, work clothes, etc.

The bag is easy to open and provides quick first aid in case of accidents. A safe and hygienic way to store and protect the bottle. Bottle is not included.

Content: -
Packaging: 10 units
Article no: 4692

**” ACCIDENTS INVOLVING
ACIDS AND ALKALI WILL
HAPPEN WHEN YOU
LEAST EXPECT THEM**

Plum Eyewash pH Neutral 4.9% Phosphate DUO saved the eyesight of a SITA France employee. They handle plastic waste like plastic bottles with cleaning detergents. The liquid from a cleaning bottle went into both eyes of the employee. Thanks to this eyewash solution, the harmful substance was neutralized, and the employee was already back at work the next day.

Plum Wound and Eyewash Sprays are portable, easy to use and saline-based sprays. They work at any angle and provide a balanced and soft flow rate. Ideal for the industrial sector, production industry, laboratories, transport of dangerous goods, first responders, law enforcement, firefighters, military and first rescue services.

Plum Wound and Eyewash Spray

Quick and easy to use within seconds
- for skin and eyes!

Gentle wound and eyewash spray used for minor accidents like cuts and scrapes on the skin or rinsing dust and dirt from wounds and eyes. This spray is available in a saline solution and a phosphate buffered saline solution. They offer safe rinsing with a quick and easy single hand operation. The dust cap protects the spray nozzle from contamination, the spray is suitable for multiple use and the can is fully recyclable.

A quick and easy solution that minimizes the risk of further infection or damage.

Cleanse the nozzle before use by briefly spraying in the air.

Place the nozzle minimum 10 cm from the wound or eye. Press the nozzle and spray. Avoid letting the nozzle touch the wound or the eye.

50 ML / 250 ML

PLUM WOUND AND EYEWASH SPRAY

A 0.9% sodium chloride solution that gives immediate care to minor accidents such as cuts and scrapes on the skin or dust and dirt in the eyes. Helps minimize the risk of further infection or damage.

200 ML - BUFFER

PLUM WOUND AND EYEWASH SPRAY

A 0.9% phosphate buffered sodium chloride solution for rinsing away dust and dirt from wounds and eyes. Wound healing is supported by this saline spray, which mechanically removes foreign bodies, reduces pathogens, as well as blood, clot and dead tissue and moistening the tissue in the process.

200 ML / 250 ML

WALL BRACKET

Make your first aid visible by mounting the Plum Wound and Eyewash Spray cans on the wall. This simple wall bracket will save you minutes if a minor eye injury or damages on the skin occur. Then you do not have to search for your Plum Wound and Eyewash Spray but it will be close at hand.

Product benefits

- Sterile until empty - allows repeated use
- Quick and easy single hand operation
- Safe rinsing
- Dust cap to protect the spray nozzle from contamination
- Easy to transport, classed as a non-flammable aerosol
- Up to 100% product emptying
- The can is fully recyclable
- Hypoallergenic
- Sterile solution without preservatives
- Shelf-life of 3 years
- Expiry date on the bottom of the can

Open eyewash stations

An open wall-mounted solution gives a good overview and quick and easy access to first aid

PROTECT YOUR COLLEAGUES, MAKE FIRST AID AVAILABLE

When an accident has happened, it is too late to look for help in a box or in a cupboard.

Systematize first aid with a wall-mounted station and make it easy to access when an accident happens. Choose between open wall stations and box solutions. The latter are particularly suitable for dusty work environments to protect the bottles and avoid adding more dust to an accident.

Make sure to have additional bottles at hand so that rinsing can continue on the way to further treatment.

EASY TO MOUNT

All wall stations are easy to mount and are delivered with pictograms that clearly shows how to use the products.

PLUM EYEWASH STATION

Wall station with 500 ml Plum Eyewash 0.9% Sodium Chloride. Particularly suitable for small and mobile workplaces.

Packaging:	1
Article no:	4611
Refill 500 ml eyewash, article no:	4604
Dimensions:	
Eyewash plan	h: 29 x w: 22,8 cm
Mounting plate	h: 29 x w: 13,5 cm

PLUM EYEWASH STATION FOR DUO BOTTLE

Wall station with 1000 ml Plum Eyewash 0.9% Sodium Chloride DUO. Particularly suitable for small and mobile workplaces where prolonged rinsing of both eyes may be required.

Packaging:	1
Article no:	4802
Refill 1000 ml eyewash, article no:	4800
Dimensions:	
Eyewash plan	h: 29 x w: 22,8 cm
Mounting plate	h: 29 x w: 13,5 cm

PLUM COMBI-STATION

Wall station with 200 ml Plum Eyewash pH Neutral 4.9% Phosphate and 500 ml Plum Eyewash 0.9% Sodium Chloride. Particularly suitable for places where there is a risk of getting both foreign bodies and acids and alkali in the eyes.

Packaging:	1
Article no:	4770
Refill 200 ml eyewash, article no:	4752
Refill 500 ml eyewash, article no:	4604 / 4613

The green Plum Eyewash 0.9% Sodium Chloride helps you remove dirt and foreign objects

The blue Plum Eyewash pH Neutral 4.9% Phosphate provides immediate first aid in case of serious accidents involving acids and alkali

.....
The soft bottles are easy to handle and rinse the eye with a soft and even flow

Clear pictograms and symbols show how to store and handle the bottle

The ergonomic soft plastic eyecup is shaped to fit the curve of the eye. Squeeze it together before putting it to your eye. The cup helps keep the eye open and provide the best possible flow of liquid and rinsing time

Quick and easy to open. A single turn breaks the seal and you are ready to rinse

Clear instructions for use

Economic and a long shelf-life of 3,5 years. The expiry date is clearly shown on the label

With the ergonomic DUO eyecup, both eyes can be rinsed at the same time. The cup helps keep the eyes open and provides the best possible flow of liquid and rinsing time

Please note: All used material is made of PE-LD, which is recyclable

Quickly accessible eyewash solutions

Quick access to eyewash is crucial for all workplaces with a risk of eye injuries, because seconds decide the impact of an accident

YOU ONLY HAVE TWO EYES – TAKE CARE OF THEM

Your eyesight is one of the most important senses. So, take care of your eyes. Accidents can happen no matter how careful you are. Stay prepared for accidents with the right first aid at the right place. An eyewash solution placed in high risk areas is the best preparation for eye injuries.

A WIDE RANGE OF UNIQUE RINSING SOLUTIONS

Our top priority is to help you get a safer place to work, and our concepts is developed in close collaboration with skilled eye specialists. This means that the products have been thought through down to the smallest detail. They are easy to use with clear pictograms that show you the correct use. The eyecup helps keep the eye open. The rinsing liquid hits the eye in the right place and with the right amount in a soft and even flow.

The products are CE marked according to the Guidelines for Classification of Medical Device Directive (MDD 93/42/EEC)

Plum iBox

– designed for your safety

Delivered with wall
bracket and wall
mounting set

Quick and efficient
overview of eyewash
bottles and expiry dates

Release from wall
bracket and quickly
bring to injured person

Quickly accessible
eyewash solutions

Delivered with an
eyewash plan

Strong and durable
material (EPP)

Spacious design lets you
grab bottles fast and
easily

Easily opens - mounted on
the wall or standing on the
floor

Dust-proof and portable eyewash box

PLUM IBOX 1

Dust-proof and portable eyewash box that fits one eyewash bottle of your choice. Suitable for dusty environments and small workplaces, with a risk of eye injuries.

Delivered empty

Packaging:	1
Article no:	4900
Dimensions:	
Eyewash plan	h: 29 x w: 22,8 cm
iBox 1	h: 42,5 x w: 18,6 x d: 13,5 cm

Plum iBox balances key features in a modern design and is built in a strong and durable material. Designed to accommodate the need for urgent action in case of an emergency by combining the quick product overview from an open station with the dust-proof features from an eyewash box, Plum iBox suits a wide range of workplaces.

A clear see-through window lets you check the bottles' condition and keep track of expiry dates immediately. A spacious design lets you grab bottles fast and easily just as the box opens smoothly - mounted on the wall or standing on the floor. Plum iBox is delivered with wall bracket, eyewash plan and wall mounting set.

Install Plum iBox as close as possible to an exposed area or work station and according to the risk assesment. Release Plum iBox from the wall and quickly bring the eyewash to the injured person. Every second counts!

PLUM IBOX 1

Dust-proof and portable eyewash box with 1000 ml Plum Eyewash 0.9% Sodium Chloride DUO. Suitable for dusty environments and small workplaces, with a risk of getting foreign bodies into the eyes.

Packaging:	1

Refill 200 ml eyewash, article no:	4752
Refill 500 ml eyewash, article no:	4604 / 4613
Dimensions:	
Eyewash plan	h: 29 x w: 22,8 cm
Eyewash box	h: 28 x w: 23 x d: 11 cm

REDUCE IMPACT WITH COMBINED RINSING

Combined rinsing is recommended in case of accidents involving acids and alkali – first with Plum Eyewash pH Neutral 4.9% Phosphate, then with Plum Eyewash 0.9% Sodium Chloride. A combi-box holds both products and gives quick and easy access. Start by neutralizing the acid or alkali with Plum Eyewash pH Neutral 4.9% Phosphate, continue rinsing with Plum Eyewash 0.9% Sodium Chloride until you reach a doctor or the emergency room.

If you work mostly with liquid chemicals, we recommend Plum Eyewash pH Neutral 4.9% Phosphate DUO. That way you can rinse both eyes at the same time in case of an emergency.

We recommend the open stations for environments without dust and dirt, such as laboratories. The closed stations protect the products in dusty environments. All stations are easy to mount and come with a mirror and pictograms clearly indicating how to use the eyewash bottles.

PLUM EYEWASH BOX

Dust-proof eyewash box with 2 x 500 ml Plum Eyewash 0.9% Sodium Chloride. Particularly suitable for dusty environments and small workplaces, with a risk of getting foreign bodies into the eyes.

Packaging:	1
Article no:	4650
Refill 500 ml eyewash, article no:	4604 / 4613
Dimensions:	
Eyewash plan	h: 29 x w: 22,8 cm
Eyewash box	h: 28 x w: 23 x d: 11 cm

PLUM COMBI-BOX DUO

Dust-proof eyewash box with 500 ml Plum Eyewash pH Neutral 4.9% Phosphate DUO and 500 ml Plum Eyewash 0.9% Sodium Chloride DUO. Particularly suitable for places with a risk of getting both foreign bodies and acids and alkali in the eyes and where there is a risk that both eyes will be affected.

Packaging:	1
Article no:	4862
Refill 500 ml eyewash (blue), article no:	4801
Refill 500 ml eyewash (green), article no:	4861

PLUM COMBI-BOX DUO MAXI

Dust-proof eyewash box with 500 ml Plum Eyewash pH Neutral 4.9% Phosphate DUO and 1000 ml Plum Eyewash 0.9% Sodium Chloride DUO. Particularly suitable for places with a risk of getting both foreign bodies and acids and alkali in the eyes and where there is a risk that both eyes will be affected.

Packaging:	1
Article no:	4810
Refill 500 ml eyewash, article no:	4801
Refill 1000 ml eyewash, article no:	4800
Dimensions:	
Eyewash plan	h: 29 x w: 22,8 cm
Eyewash box	h: 35,7 x w: 25,2 x d: 11,6 cm

The soft close system makes it easy to open and close the eyewash box and protects it from dust and dirt from the surroundings

Made of polystyrene - a light, isolating and environmentally friendly material. It is produced with less plastic compared to a 100% plastic construction.

When replaced the eyewash box is suitable for burning

Easy to mount close to the working station

The moulded holders fit all our eyewash bottles - both with regular and DUO eyecups - and keep them securely stored

Appointed "Worldstar Winner" for being an innovative product because the packaging is an integrated and permanent part of the product

PLUM EYEWASH BOX DUO MAXI

Dust-proof eyewash box with 2 x 1000 ml Plum Eyewash 0.9% Sodium Chloride DUO. Particularly suitable for places where prolonged rinsing may be required.

PLUM EYEWASH PLUG & HEAT BOX, SMALL

Dust-proof eyewash box with a heating element. Ensures the eyewash liquid has a comfortable shower temperature. Suitable for 2 bottles of 200 ml and/or 500 ml eyewash. Delivered empty.

ENSURE THE RIGHT TEMPERATURE

Whatever the reason, most often quick help is needed when you get something in the eye. Therefore, preparedness must be in place and be easily accessible at the workplace – also under cold weather conditions.

For fast and effective decontamination of bodies and surfaces in contact with corrosive and toxic hazardous substances such as strong acids and bases, oxidants, formaldehyde, phenols, organic solvents, hydrofluoric acid, and fluorides.

Plum BodyNeutrAll

Mobile body shower with a highly effective decontamination solution for skin, surfaces and clothing.

Plum BodyNeutrAll contains ascorbic acid, an amino acid buffer, and calcium ions as active substances. Glycerin, polyethylene and glycol are solubilizers for organic chemicals.

PLUM BODYNEUTRALL:

- ✓ reduces strong oxidants (such as chlorine, hypochlorite, chlorine dioxide, chloramine, bromine, iodine, fluorine, hydrogen peroxide, peracetic acid) to compounds that are no longer active.
- ✓ binds aldehydes into imines, phenols into amines, and heavy metals into ammine complexes.
- ✓ binds hydrofluoric acid and fluorides into the sparingly soluble calcium fluoride.
- ✓ dissolves organic solvents and chemicals.

PERMITS / APPROVALS OF THE DECONTAMINATION SOLUTION:

- Certification as a class I medical device according to the requirements of the EU Regulation EU 2017/745.
- Officially registered by the Federal Office for Drugs and Medical Devices under the number DE/CA33/ILM/2020/1. The registration is valid for the entire EU and may be marked with the CE mark accordingly.
- Conforms to DIN 14555-12 for hazardous goods equipment trolley.

PLUM BODYNEUTRALL 5 L

5 L empty sprayer which comes with a canister of mixed liquid to fill in the sprayer. This is suitable for larger areas up to 50 m² and covers several people.

Packaging: 1
Article no: 4735
Dimensions:
 Sprayer h: 57 (with lance: 80) x w: 22 cm
 Ø18 cm

PLUM BODYNEUTRALL 600 ML

2 bottles of 300 ml to be mixed and used with a sprayhead. Easy to use on smaller areas up to 6 m² or up to 3 persons.

Packaging: 4
Article no: 4736
Dimensions:
 2 bottles with h: 29 x w: 11 x d: 6 cm
 sprayhead

PLUM BODYNEUTRALL 100 ML

Mixed, pocket-sized bottle to bring along and it covers approx. 1 m² or 1 arm's length.

Packaging: 6
Article no: 4737
Dimensions: h: 13 x w: 6.5 x d: 3.1 cm

C-GEL 30 G

Prevents the effect of toxic fluorides on the skin in case of contamination with hydrofluoric acid. Simplified application in an emergency - can also be used with gloves - due to the pressure dispenser.

Packaging: 8
Article no: 4738

plum QuickFix

PLUM QUICKFIX IS A UNIQUE DISPENSER:

- Immediate and visible access to plasters and eyewash ampoules
- Each plaster is ready for use with a pull from the dispenser
- Each plaster is packed separately
- Only one hand is needed to apply
- Easily refilled as required
- Easy to see when it is empty
- Quickly stops minor bleeding without staining the other plasters
- Small dimensions - easy to find room for the Plum QuickFix dispenser
- Includes a shelf for storing small, relevant objects
- Can be locked so that it can only be opened with a key

Your quick help for minor everyday accidents

Mount the plaster dispenser on the wall and save time.
Put on the plaster - and back to work!

QUICK AND HYGIENIC HELP WITH MINOR INJURIES

Stop wasting time on minor injuries. Grab a plaster from the dispenser, put it on, and go back to work! Plum QuickFix solves the problem easily, hygienically and effectively.

Lots of minor accidents happen every day at work where a plaster is all that is needed. Choose the right plaster for your work situation. A suitable solution is available whether you need plasters for common work situations, for workplaces with a lot of humidity or for work within the food sector.

Grab the plaster from the dispenser.
It is ready for use.....

... and can be applied
using one hand

Flexible system for all types of work

Plum QuickFix provides a structured approach
to first aid of minor injuries

CHOOSE THE DISPENSER THAT BEST SUITS YOUR NEEDS

Our range of Plum QuickFix plaster dispensers contain two types of dispensers in different designs. They are developed for different types of workplaces and they can be filled with plasters and ampoules of eyewash in a variety of mixes to meet the needs of every work situation.

PLUM QUICKFIX DISPENSER

The classic green dispenser contains two refills of Plum QuickFix plasters and/or Plum Eyewash 0.9% Sodium Chloride QuickRinse ampoules. The green cap protects the content of the dispenser from dust and dirt from the workplace. It is designed with an inside shelf for smaller objects and it can be secured with lock and key.

The dispenser can be used in any location with risk of injuries and scratches. The dispenser is designed for mounting on any stationary workplace.

Dimensions: h: 135 x w: 230 x d: 32 mm

PLUM QUICKFIX UNO DISPENSER

For workplaces that are not challenged with dust and dirt, we have developed the Plum QuickFix UNO plaster dispenser. It is a small and modern dispenser in a unique design that combines workplace safety with modern style.

The dispenser contains 1 refill of Plum QuickFix plasters or Plum Eyewash 0.9% Sodium Chloride QuickRinse ampoules.

Plum QuickFix UNO is available with a glossy white or a transparent cover.

Dimensions: h: 85 x w: 130 x d: 35 mm

PLUM EYEWASH 0.9% SODIUM CHLORIDE QUICKRINSE - 5 X 20 ML

5 eyewash ampoules with 20 ml 0.9% sterile sodium chloride. For use individually or for refilling QuickSafe®, Plum QuickFix-&Rinse and Plum QuickRinse dispensers.

Content: 5 x 20 ml
Packaging: 4 x 5 x 20 ml
Article no: 5160

QuickSafe® gives you quick, easy and safe first aid

A flexible solution that gives a quick overview of the available first aid - and makes it easy to always have the right products in the right place

CUSTOMIZED FIRST AID STATIONS

Fill your first aid station according to your needs. Plum Eyewash 0.9% Sodium Chloride for rinsing foreign bodies from the eye, and Plum Eyewash pH Neutral 4.9% Phosphate for accidents with acids or alkali. Plasters that are suitable for your work situation. Burn gel that soothes minor burns. Eyewash ampoules for minor accidents and irritated eyes. Wipes for cleansing wounds. Compress dressings for more serious accidents.

All of it behind a transparent cover that will give you a perfect overview of what you need.

” GET THE MOST IMPORTANT ITEMS IN THE RIGHT PLACE

Spæncom A/S is a leading supplier of concrete elements. The company has chosen Quicksafe® in order to increase safety for their more than 500 employees. “We have chosen Quicksafe®, because the station can be organized to suit the individual work area. In the areas where concrete elements are acid-washed, we can, for example, place the eyewash bottles close to the work situation. QuickSafe® contains the most necessary items, it can be placed so that first aid is close at hand, and it is very practical with the transparent cover.”

Jany Johannsen,
Environment and Safety Coordinator

QuickSafe® EMPTY

YOU MAKE THE DECISIONS

If you want full freedom to organize your first aid according to your requirements, you can start with an empty station and fill it to suit your specific situation.

BUY AN EMPTY STATION AND FILL IT TO MEET YOUR NEEDS

If you have requirements that we do not meet with the 4 different QuickSafe® solutions presented on the following page, you can get a 100% customized solution. Start with a wall station and fill it with eye-wash bottles and other first aid products.

Packaging: 1
Article no: 5173
Dimensions: h: 430 x w: 253 x d: 92 mm

Help is at hand

Easy access to first aid is the key to increased safety

The eyewash plan is included in all QuickSafe® stations

plum
Safety

QuickSafe® BASIC

A GOOD STARTING POINT

With a QuickSafe® Basic you get the most essential products and can choose the contents for the top shelves. It gives you full flexibility.

DO YOU HAVE SPECIAL REQUIREMENTS REGARDING YOUR FIRST AID STATION?

The backbone of the entire QuickSafe® series is Plum's acclaimed eyewash. With QuickSafe® Basic you will get it in a combination with Plum Eyewash pH Neutral 4.9% Phosphate, Plum Eyewash 0.9% Sodium Chloride, eye-wash ampoules and plasters. The rest is up to you. Organize the shelf in the station to suit your company's requirements.

Plum BurnOut

Fire Suppression Spray

Plum BurnOut is a fire suppression spray and a practical supplement to a regular fire extinguisher. The spray bottle is easy to bring along and contains an inorganic, water-based fluid that provides a unique fire protection. Furthermore, it has one of the strongest environmental profiles on the market today.

PRODUCT FACTS AND BENEFITS

- ✓ Environmentally neutral liquid (pH 7.5)
- ✓ PFAS and surfactant free
- ✓ High EC 50 score (Effect Concentration that measure bacterial content after use - high percent means good, low is bad) Seawater 21% /Lake water 41%
- ✓ Non-toxic
- ✓ Fire class A
- ✓ Good suppression effect
- ✓ Empties in 20 seconds and scope 2 meters

Plum BurnOut is to be used for rapid assistance in early-stage extinguishing, used by fire wardens (industry), security guards, as well as in homes, restaurants, mobile homes and caravans, indeed any place where a small extinguisher can be used first and suppress the fire.

It can be mounted in a wall bracket, and it is suitable for wood, paper, and fabrics.

Plum BurnOut is highly effective, has fantastic re-ignition protection and it is safe to use.
