

GENERAL DESCRIPTION

LWS is a specially blended mix of the most effective materials to solidify liquid waste in most situations.

AREAS OF APPLICATION

This unique blend is designed to effectively and quickly contain spills in nursing homes, hospitals, hotels, taxi fleets, etc... in all Industrial, Institutional, commercial, municipal waste and farm applications.

SPECIAL FEATURES

Contains chlorine to disinfect areas - rapidly absorbing material soaks up the spill and then the chlorine goes to work to disinfect the area.

Concentrated - LWS absorbs a minimum of 40 times its weight. A simple and effective way to clean up messy spills.

MULTIPLE USES

Latex Paint - gels and hardens for disposal.

Ice Packs - keeps water colder for longer.

Autopsy Absorbents - stops leakage of body fluids.

Solidify Liquid Waste - gels liquids for disposal.

Vomit - quickly gels to allow sweeping.

Police Crowd Control - spray a diluted suspension from a water cannon. Roads and sidewalks become so slippery that people cannot stand up.

WWTP Polymer Spills - sprinkle a small bit on the spill. Within minutes a synergy develops and the two polymers start to link. The gel stiffens for easy disposal.

USE DIRECTIONS

Simply sprinkle on spill.

Sweep up material for disposal. Use Waterco Polysolv for clean-up.

CAUTION: Extremely slippery when wet. Use with care.

PHYSICAL PROPERTIES - GRANULES

Type	Liquid Waste Solidifier
Appearance	Beige Granules
Odour	None
Flammability	Non-Flammable
pH (concentrate)	n/a
Specific Gravity	n/a
Solubility in Water	None
Toxicity (concentrate)	Slight Eye/Skin Irritant
	Avoid Ingestion

**FOR USE IN
INDUSTRIAL, INSTITUTIONAL,
MARINE AND COMMERCIAL
ENVIRONMENTS**

PACKAGING

Case (6 x 24oz shaker containers)
