

# MEG-A-LOOSE

## PENETRANT LUBRICANT

## TECHNICAL DATA

### GENERAL DESCRIPTION

MEG-A-LOOSE is a mixture of active rust dissolvers in conjunction with a unique blend of lubricants making it far more effective than conventional penetrating products. Provides superior lubrication during disassembly to prevent seizing.

### AREAS OF APPLICATION

Penetrating to free frozen nuts, bolts, screws, lags, fasteners and working parts. Providing pressure and wear resistant lubrication of tightly threaded fittings, parts, locks, hinges, linkages and tools. Flushes out dirt and old contaminated lubricants while at the same time providing increased penetration to free parts and at the same time deeply deposit a micronic lubricating blend of molybdenum and additional quality lubricants to lubricate where most needed.

### SPECIAL FEATURES

**Highly Effective** - strong rust dissolvers free blocked parts quickly. Accelerated penetration through rust and dirt to free working mechanisms quickly.

**Repels Moisture** - drives out moisture and guards against the further effects of water and corrosion.

**Cleans and Protects** - cleans and flushes all mechanical surfaces while providing a residual protective coating.

**Superior Lubrication** - provides superior lubrication during disassembly as well as in continued use. Contains a unique superior lubricant blend, including molybdenum, to greatly extend lubricating properties. Eliminates squeaks and squeals.

**Safe To Use** - does not adversely effect rubber. Excellent for all types of metal or metal combinations, even sensitive applications such as steel/aluminum joints. Contains no silicone or chlorinated solvents.

### USE DIRECTIONS

Saturate frozen or stiff parts and allow to stand for a few minutes before attempting to break free. Loosen parts carefully. A wire brush should be used prior to spraying wherever heavily encrusted rust, corrosion or scale is encountered. Respray parts before and after reassembly for improved working conditions as well as easier future disassembly.

### PHYSICAL PROPERTIES - AEROSOL

MEG-A-LOOSE consists of a unique blend of specially selected quality lubricants and penetrants.

Type .....	Aerosol Lubricant/Penetrant
Appearance .....	Green/Grey Liquid
Odour .....	Characteristic Solvent
Viscosity .....	Water Thin
Flammability .....	Extremely Flammable
Specific Gravity .....	0.80
Solubility in Water .....	Negligible
Toxicity (concentrate) .....	Eye/Skin Irritant
Avoid prolonged breathing of vapours	

**FOR USE IN INDUSTRIAL, INSTITUTIONAL,  
MARINE AND COMMERCIAL  
ENVIRONMENTS**

### PACKAGING

Aerosol Case (12 x 376g Cans)

DM1112

**361 CONNIE CRESCENT, CONCORD, ONTARIO, CANADA L4K 5R2**
