

Interflon Fin Super Dry Lube

Multipurpose oil for bicycles

The versatility of this oil lies in its universal use – the oil cleans, lubricates, preserves and protects against corrosion.

Interflon Fin Super Dry Lube is recommended by mountain bike and bicycle professionals and all kinds of recreational mountain bikers and cyclists.

- ⦿ Non-Greasy compared to conventional oils
- ⦿ Small, practical packaging for easy handling
- ⦿ Clean, dry lubrication and anti-corrosion protection
- ⦿ Works its way in leaving a dry lubricating film with MicPol® sliding particles which avoids that dirt sticks to the chain and other moving parts
- ⦿ Guarantees the correct working of all moving elements, reduces wear and tear, avoids costly repairs
- ⦿ Easy to clean dirt off the chain
- ⦿ User-friendly and replaces several products
- ⦿ Extends the lubrication interval up to 10 times
- ⦿ Does not degrade rubber or plastic

Interflon for bicycle maintenance all year around

● Lubrication and preservation:
Application of Interflon Fin Super Dry Lube according to instructions below.

● Component assembly:
On bearings, bolts, handlebar heads and wheel axles use Interflon Assembly Grease. The Interflon Tube dispenser helps you to lubricate the precise amount.

● Cleaning:
Rinse off coarse dirt with water. For fine dirt and residues of the original lubricant use Interflon Metal Clean F.

Instruction for using Interflon Fin Super Dry Lube

Shake the product: Apply on a cleaned chain and leave for 10 minutes. Then wipe off all oil = dry lubrication with MicPol®. With subsequent applications, it is no longer necessary to use a cleaner.

Warning: The lubricant must not come into contact with the wheel brake system.
