

VEHICLE CLEANING, PROTECTING and POLISHING SYSTEM

GENERAL DESCRIPTION

MoonShyne™ is the latest scientific formulation providing both excellent vehicle washing properties along with a monomolecular protective barrier which gives not only finish protection but a beautiful lasting shine all in one simple application.

AREAS OF APPLICATION

Great where frequent washing and/or polishing is necessary to maintain superior vehicle appearance. Effective for hand or automatic washing of all types of vehicles such as new and used cars and trucks, taxi and police fleets, fire trucks, ambulances, delivery vans, transport and municipal vehicle fleets, buses, subway cars, trains and aircraft.

SPECIAL FEATURES

Highly Effective - specially formulated to quickly and easily remove dirt, salt, oil and road film from vehicle surfaces while at the same time provide a superior monomolecular protective surface film for a lustrous lasting shine without the necessity of polishing or buffing - all in one simple step and without any build-up.

Protects - leaves a monomolecular surface tenacious barrier layer which temporarily bonds to the vehicle finish providing protection from dirt, soils, oils, grease, tar and sap and making re-washing so much easier.

Shines - provides a beautiful lasting high sheen finish with a real mirror depth appearance to actually improve the appearance of finishes which have dulled due to oxidation - greatly enhances overall vehicle appearance.

Safe To Use - formulated to be safe for use on all vehicle surfaces from various plastics and metals to highly polished painted finishes.

Economical - highly concentrated to produce maximum results with a minimum amount of product.

USE DIRECTIONS

MANUAL WASHING - Pre-rinse vehicle to remove excess soils. Using **MoonShyne™** in dilution of 3 to 6 mL per litre (½ to 1 oz per gallon) of hot water, apply via soft wash brush, sponge or mitt to all vehicle surfaces working from the lowest point up. Wash vehicle in sections, thoroughly hose or pressure rinsing each section (from the bottom up) before proceeding to the next section. Do not allow solution to dry on vehicle prior to rinsing. Thoroughly flush rinse entire vehicle working from the top down. Allow to air dry or chamois dry where excessive hard water or fast drying conditions exist.

AUTOMATIC or PRESSURE WASHING - Where practical, pre-rinse as above. Mix **MoonShyne™** in solution tank or inject directly into automatic system at a rate of 1½ to 3 mL per litre (¼ to ½ oz per gallon) of hot water. Wash vehicle via usual method (from the lowest point up), brushing areas of extreme soil. Rinse vehicle thoroughly (from the bottom up) followed by flush rinsing the entire vehicle from the top down. Do not allow solution to dry on vehicle prior to rinsing. Allow to air dry or chamois dry where excessive hard water or fast drying conditions exist.

NOTE - For best results avoid washing vehicles in direct sunlight or under extreme heat conditions.

PHYSICAL PROPERTIES - LIQUID

MoonShyne™ consists of a blend of superior surfactants, wetting agents and protectants.

Type	Vehicle Cleaner/Protectant
Appearance	Opaque Purple Liquid
Odour	Light Lemon-Lime
Viscosity	Slightly Viscous
pH (concentrate)	9.0
Specific Gravity	1.02
Flammability	Non-Flammable
Solubility in Water	Complete
Toxicity (concentrate)	Low; Eye/Skin Irritant

**FOR USE IN
INDUSTRIAL, INSTITUTIONAL,
MARINE AND COMMERCIAL
ENVIRONMENTS**

PACKAGING

210 Litre Drum; 23 Litre Pail; Case (4x4L)
