# Protect your people Equip your facility right

Quick and easy access to first aid will limit the impact of accidents and keep your workplace safe

---

Accidents happen every day. Minimize the extent and impact by making sure you have the right first aid solutions available where accidents can happen. A first aid solution tailored to your workplace will help you prepare for accidents and quickly treat eye injuries, cuts and minor wounds in a safe and hygienic way.

## QUICK AND EFFECTIVE HELP TAILORED TO YOUR BUSINESS

A wide range of eyewash, plasters, burn gel and wound cleansing wipes, helps to quickly treat you or your colleague and minimize the damage of an accident. It is essential that the mix of safety products is fitted to the requirements of your workplace.

We will help you find the right solution, whether you work in an office or handle acids or alkali in a high-risk environment like charging batteries, industrial cleaning, laboratory work or petrochemical industry.

## PRACTICAL SOLUTIONS FOR BUSY WORKING DAYS

Your hands, your eyes and your head are your most important working tools. Even a small incident can affect your work, and larger ones may cause an even greater impact if you are not prepared. By taking the correct precautions, you enable yourself to have the right first aid within reach, whereby many smaller everyday accidents can be minimized significantly.

*Plum Eyewash is easy to use if an accident happens*

*Turn the eyecup in the direction of the arrow 360° until the seal breaks*

*Lean back, squeeze the bottle gently and rinse*

*Or lean forward and rinse by squeezing the bottle gently*

# How to choose the correct eyewash

When it comes to eye accidents, the harmful substance varies and you need to choose the right eyewash accordingly

The cause of an accident determines which eyewash is required. When an accident occurs, it is essential to determine whether it is caused by either a foreign object or by acids or alkali - and if possible, which pH value the substance in question holds.

## Know your chemicals and ensure the best suited first aid.

An eyewash plan helps you choose the right eyewash by clear guidelines. Place the eyewash plan next to the eyewash stations, boxes and QuickSafe®.

How to use Plum Eyewash

How to use Plum Eyewash DUO

Art.nr. 956480B

Dimensions: W: 22,8 x H: 29,0 cm

The pH scale ranges from 0 to 14 and measures how acidic or alkalic a substance is.

- A pH of 7 is neutral
- A pH less than 7 is acidic
- A pH greater than 7 is alkalic

When pH is either strongly acidic or alkalic, start by rinsing with Plum pH Neutral until the bottle is empty. Discard the bottle and rinse with Plum Eyewash until you reach a doctor or the emergency room.

When pH is neutral, rinse with Plum Eyewash until the bottle is empty and discard the bottle after use.

(animation video)

QR-code:  
How to use Plum Eyewash DUO  
(animation video)

Mount the eyewash plan on the wall next to the eyewash station. Mark off 145 cm from the floor and place the eyewash plan according to the mark.

## Rinse both eyes simultaneously

You no longer have to choose which eye to save. Plum DUO eyecup is a unique solution and allows you to rinse both eyes at the same time and save them both

---

### MANY ACCIDENTS AFFECT BOTH EYES

Eye accidents involving chemicals often affect both eyes. A DUO eyecup helps you prepare, because it allows rinsing of both eyes at the same time. Stop worrying about which eye to save, save them both at once instead.

### EYECUP FOR OPTIMAL RINSING

Apart from the strength of the acid or alkali, the contact time is the most critical factor in accidents involving acids and alkali. It is key that the available first aid neutralize the harmful substance as quickly as possible. With the unique DUO eyecup, you can treat both eyes at the same time.

The eyecup is shaped to help you keep your eyes open during rinsing and ensure the correct flow of liquid and rinsing time.

Plum Eyewash and Plum pH Neutral are disposable products, which ensure that the rinsing liquid is sterile every time

# Eyewash in case of foreign objects

Plum Eyewash eases discomfort and prevents following complications caused by foreign bodies in the eyes

---

You can easily get a foreign object in your eye. Dirt, dust, cleaning agents or paint from your hands all pose a risk for your eyes. The risk increases when working with machines and tools that can cause wood or metal splinters in your eyes.

Getting a foreign body in your eye can be extremely unpleasant, as the eye is highly sensitive. Without treatment, it can develop into an inflammation of the eye, cornea or iris. By rinsing immediately after the incident, you can prevent this and decrease the risk of following complications.

Plum Eyewash contains a sterile saline solution of 0.9% sodium chloride, which is similar to the eye's natural fluid. Squeeze the bottle gently to generate a soft and pleasant flow. The eyewash product range includes everything from a small handy bottle that you can carry with you, to wall-mounted stations that makes it quick and easy to get help in case of an emergency.

**200 ML / 500 ML / 1000 ML****PLUM EYEWASH**

Bottles with a 0.9% sterile sodium chloride solution. The bottles can be used individually or as refills in eyewash stations and boxes. They come with a dust cap. The 200 ml bottle is easy to store in the specially designed belt bag, in the first aid kit, in the toolbox, etc.

**Article no:** 4605

# Eyewash in case of chemical accidents

Plum pH Neutral  
neutralizes acids and  
alkali and quickly flush  
them from the eye  
during rinsing

## IMPORTANT

Reservation is made for  
**hydrofluoric acid, which is toxic  
and highly corrosive to skin and  
bones.**

Plum pH Neutral and Plum Eyewash  
may neutralize and rinse, but not  
limit the corrosive effect.

They are not intended as first aid for  
eye accidents involving hydrofluoric  
acid.

## RECOMMENDED USE OF PLUM pH NEUTRAL

Plum pH Neutral is an eyewash  
solution for accidents involving  
acids and alkali.

Rinse with Plum pH Neutral to  
reduce the pH value of the harmful  
substance to a harmless level as  
quickly as possible.

Continue rinsing with Plum Eyewash  
0.9% sodium chloride until you  
reach a doctor or emergency room.

## DANGEROUS CHEMICALS ARE EVERYWHERE

In many jobs, businesses and industries, there is a risk of being exposed to serious eye injuries caused by chemicals e.g. in chemical factories, the recycling industry, on construction sites and in the mining industry. You need a neutralizing eyewash to minimize the impact of the accident.

Acids and alkali can break down the structure of skin and mucosa membranes. The severity of corrosion injuries depends primarily on:

- The concentration of the chemical  
Strong acids and alkali are extremely corrosive
- The temperature  
A high temperature increases the corrosive properties of the chemical
- The duration of contact  
The longer the duration, the deeper the harmful substance will penetrate

## A FEW SECONDS CAN MAKE THE DIFFERENCE

In case of eye injuries involving acids and alkali, it is crucial to neutralize the chemical as quickly as possible to a pH level of approximately 7.4, corresponding to the normal pH level of the eye's fluid - before the acid or alkali has penetrated the cornea.

To optimize safety where there is a risk of acid and alkali injuries, the eyewash solution must be:

- Easily accessible
- Quick to use
- Effective

## QUICK AND EFFECTIVE EYEWASH IS KEY

Plum pH Neutral is a 4.9% phosphate buffer that will quickly and effectively neutralize even strong acids and alkali. The liquid consists of phosphate salts that are present in the body. The hydrogen phosphate buffer is effective against acids, whereas the dihydrogen phosphate buffer reacts against alkali. The effect of Plum pH Neutral has been documented in scientific studies.<sup>1) 2)</sup>

We have tested the neutralizing effect of Plum pH Neutral for both strong acids and alkali compared with the effect of saline eyewash with 0.9% sodium chloride. The test clearly shows that Plum pH Neutral will quickly neutralize both acids and alkali to a harmless pH level. Saline eyewash dilutes the liquid, but only small changes to the pH value are obtained (Figure 1).

**Figure 1: Neutralizing effect of Plum pH Neutral and 0.9 % sodium chloride\***

**BELT BAG  
FOR 200 ML BOTTLES**

Carry your eyewash in this practical bag for your belt, work clothes, etc.

The bag is easy to open and provides quick first aid in case of accidents. A safe and hygienic way to store and protect the bottle. Bottle is not included.

” **ACCIDENTS INVOLVING  
ACIDS AND ALKALI WILL  
HAPPEN WHEN YOU  
LEAST EXPECT THEM**

Plum pH Neutral DUO saved the eyesight of a SITA France employee. They handle plastic waste like plastic bottles with cleaning detergents. The liquid from a cleaning bottle went into both employee's eyes. Thanks to Plum pH Neutral DUO, the harmful substance was neutralized, and the employee was already back at work the next day.

*Plum Wound and Eyewash Sprays are portable, easy to use and saline-based sprays. They work at any angle and provide a balanced and soft flow rate. Ideal for the industrial sector, production industry, laboratories, transport of dangerous goods, first responders, law enforcement, firefighters, military and first rescue services.*

# Wound & Eyewash Spray

Quick and easy to use within seconds  
- for skin and eyes!

Gentle wound and eyewash spray used for minor accidents like cuts and scrapes on the skin or rinsing dust and dirt from wounds and eyes. The wound and eyewash spray is available in a saline solution and a phosphate buffered saline solution. They offer safe rinsing with a quick and easy single hand operation. The dust cap protects the spray nozzle from contamination, the spray is suitable for multiple use and the can is fully recyclable.

A quick and easy solution that minimizes the risk of further infection or damage.

Cleanse the nozzle before use by briefly spraying in the air.

Place the nozzle minimum 10 cm from the wound or eye. Press the nozzle and spray. Avoid letting the nozzle touch the wound or the eye.

#### 50 ML / 250 ML

##### WOUND AND EYEWASH SPRAY

A 0.9% sodium chloride solution that gives immediate care to minor accidents such as cuts and scrapes on the skin or dust and dirt in the eyes. Helps minimize the risk of further infection or damage.

##### Wound and Eyewash Spray

**Content:** 50 ml  
**Packaging:** 24 x 50 ml  
**Article no:** 45530  
**Languages:** en, de, sv, da, fr, no

**Wall bracket:** 4123

#### 200 ML

##### WOUND AND EYEWASH BUFFER SPRAY

A 0.9% phosphate buffered sodium chloride solution for rinsing away dust and dirt from wounds and eyes. Wound healing is supported by this saline spray, which mechanically removes foreign bodies, reduces pathogens, as well as blood, clot and dead tissue and moistening the tissue in the process.

##### Wound and Eyewash Buffer Spray

**Content:** 200 ml  
**Packaging:** 12 x 200 ml  
**Article no:** 4556  
**Wall bracket:** 4123

Plum Wound and Eyewash Spray is CE marked according to the Guidelines for Classification of Medical Device Directive (MDD 93/42/EEC)

#### 200 ML / 250 ML

##### WALL BRACKET

Make your first aid visible by mounting the Wound and Eyewash Spray cans on the wall. This simple wall bracket will save you minutes if a minor eye injury or damages on the skin occur. Then you do not have to search for your Wound and Eyewash Spray but it will be close at hand.

##### Bracket for 200 ml and 250 ml spray

**Content:** 1  
**Packaging:** 24 pcs  
**Article no:** 4123

## Product benefits

- Sterile until empty - allows repeated use
- Quick and easy single hand operation
- Safe rinsing
- Dust cap to protect the spray nozzle from contamination
- Easy to transport, classed as a non-flammable aerosol
- Up to 100% product emptying
- The can is fully recyclable
- Hypoallergenic
- Sterile solution without preservatives
- Shelf-life of 3 years
- Expiry date on the bottom of the can

# Open eyewash stations

## EYEWASH SIGN

Sign for mounting on the wall above eyewash station. Clearly indicates the localization of the eyewash station.

**Packaging:** 1  
**Article no:** 4401  
**Dimensions:** h: 15 x w: 15 cm

An open wall-mounted solution gives a good overview and quick and easy access to first aid

## PROTECT YOUR COLLEAGUES, MAKE FIRST AID AVAILABLE

When an accident has happened, it is too late to look for help in a box or in a cupboard.

Systematize first aid with a wall-mounted station and make it easy to access when an accident happens. Choose between open wall stations and box solutions. The latter are particularly suitable for dusty work environments to protect the bottles and avoid adding more dust to an accident.

Make sure to have additional bottles at hand so that rinsing can continue on the way to further treatment.

## EASY TO MOUNT

All wall stations are easy to mount and are delivered with pictograms that clearly shows how to use the products.

## PLUM EYEWASH STATION

Wall station with 500 ml Plum Eyewash. Particularly suitable for small and mobile workplaces.

**Packaging:** 1  
**Article no:** 4611  
**Dimensions:**  
 Eyewash plan h: 29 x w: 22,8 cm  
 Mounting plate h: 29 x w: 13,5 cm

## PLUM EYEWASH STATION DUO

Wall station with 1000 ml Plum Eyewash DUO. Particularly suitable for small and mobile workplaces where prolonged rinsing of both eyes may be required.

**Packaging:** 1  
**Article no:** 4802  
**Dimensions:**  
 Eyewash plan h: 29 x w: 22,8 cm  
 Mounting plate h: 29 x w: 13,5 cm

### PLUM COMBI-STATION

Wall station with 200 ml Plum pH Neutral and 500 ml Plum Eyewash. Particularly suitable for places where there is a risk of getting both foreign bodies and acids and alkali in the eyes.

## Quickly accessible eyewash solutions

Quick access to eyewash is crucial for all workplaces with a risk of eye injuries, because seconds decide the impact of an accident

### YOU ONLY HAVE TWO EYES – TAKE CARE OF THEM

Your eyesight is one of the most important senses. So, take care of your eyes. Accidents can happen no matter how careful you are. Stay prepared for accidents with the right first aid at the right place. An eyewash solution placed in high risk areas is the best preparation for eye injuries.

### A WIDE RANGE OF UNIQUE RINSING SOLUTIONS

Our top priority is to help you get a safer place to work, and our concepts are developed in close collaboration with skilled eye specialists. This means that the products have been thought through down to the smallest detail. They are easy to use with clear pictograms that show you the correct use. The eyecup helps keep the eye open. The rinsing liquid hits the eye in the right place and with the right amount in a soft and even flow.

The products are CE marked according to the Guidelines for Classification of Medical Device Directive (MDD 93/42/EEC)

# Plum iBox

– designed for your safety

Delivered with wall  
bracket and wall  
mounting set

Quick and efficient  
overview of eyewash  
bottles and expiry dates

Release from wall  
bracket and quickly  
bring to injured person

Quickly accessible  
eyewash solutions

Delivered with an  
eyewash plan

Strong and durable  
material (EPP)

Spacious design lets you  
grab bottles fast and  
easily

Easily opens - mounted on  
the wall or standing on the  
floor

# Dust-proof and portable eyewash box

## PLUM IBOX 1

Dust-proof and portable eyewash box that fits one eyewash bottle of your choice. Suitable for dusty environments and small workplaces, with a risk of eye injuries.

*Delivered empty*

<b>Packaging:</b>	1
<b>Article no:</b>	4900
<b>Dimensions:</b>	
Eyewash plan	h: 29 x w: 22,8 cm
iBox 1	h: 42,5 x w: 18,6 x d: 13,5 cm

Plum iBox balances key features in a modern design and is built in a strong and durable material. Designed to accommodate the need for urgent action in case of an emergency by combining the quick product overview from an open station with the dust-proof features from an eyewash box, Plum iBox suits a wide range of workplaces.

A clear see-through window lets you check the bottles' condition and keep track of expiry dates immediately. A spacious design lets you grab bottles fast and easily just as the box opens smoothly - mounted on the wall or standing on the floor. Plum iBox is delivered with wall bracket, eyewash plan and wall mounting set.

Install Plum iBox as close as possible to an exposed area or work station and according to the risk assesment. Release Plum iBox from the wall and quickly bring the eyewash to the injured person. Every second counts!

# Dust-proof eyewash box

A closed station protects your first aid equipment from dirt and dust and keeps the products ready for use

## PLUM COMBI-BOX

Dust-proof eyewash box with 200 ml pH Neutral and 500 ml Plum Eyewash. Suitable for places where there is a risk of getting both foreign bodies and acids and alkali in the eye.

<b>Packaging:</b>	1
<b>Article no:</b>	4789
<b>Dimensions:</b>	
Eyewash plan	h: 29 x w: 22,8 cm
Eyewash box	h: 28 x w: 23 x d: 11 cm

## REDUCE IMPACT WITH COMBINED RISING

Combined rinsing is recommended in case of accidents involving acids and alkali – first with Plum pH Neutral, then with Plum Eyewash. A combi-box holds both products and gives quick and easy access. Start by neutralizing the acid or alkali with Plum pH Neutral, continue rinsing with Plum Eyewash until you reach a doctor or the emergency room.

If you work mostly with liquid chemicals, we recommend Plum pH Neutral DUO. That way you can rinse both eyes at the same time in case of an emergency.

We recommend the open stations for environments without dust and dirt, such as laboratories. The closed stations protect the products in dusty environments. All stations are easy to mount and come with a mirror and pictograms clearly indicating how to use the eyewash bottles.

## PLUM EYEWASH BOX

Dust-proof eyewash box with 2 x 500 ml Plum Eyewash. Particularly suitable for dusty environments and small workplaces, with a risk of getting foreign bodies into the eyes.

# Quick Fix

## QUICKFIX IS A UNIQUE DISPENSER:

- Immediate and visible access to plasters and eyewash ampoules
- Each plaster is ready for use with a pull from the dispenser
- Each plaster is packed separately
- Only one hand is needed to apply
- Easily refilled as required
- Easy to see when it is empty
- Quickly stops minor bleeding without staining the other plasters
- Small dimensions - easy to find room for the QuickFix dispenser
- Includes a shelf for storing small, relevant objects
- Can be locked so that it can only be opened with a key

## Your quick help for minor everyday accidents

Mount the plaster dispenser on the wall and save time.  
Put on the plaster - and back to work!

### QUICK AND HYGIENIC HELP WITH MINOR INJURIES

Stop wasting time on minor injuries. Take a plaster from the dispenser, put it on, and go back to work! QuickFix solves the problem easily, hygienically and effectively.

Lots of minor accidents happen every day at work where a plaster is all that is needed. Choose the right plaster for your work situation. A suitable solution is available whether you need plasters for common work situations, for workplaces with a lot of humidity or for work within the food sector.

Take the plaster from the dispenser.  
It is ready for use...

... and can be put on  
using one hand

How to use QuickFix  
(animation video)

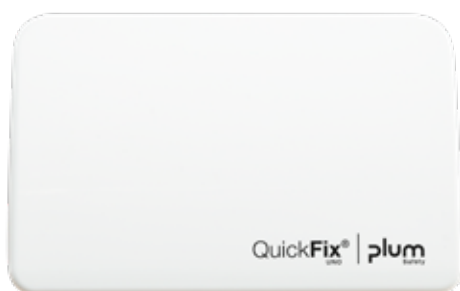

# Flexible system for all types of work

QuickFix provides a structured approach  
to first aid of minor injuries

## CHOOSE THE DISPENSER THAT BEST SUITS YOUR NEEDS

Our range of QuickFix plaster dispensers contain two types of dispensers in different designs. They are developed for different types of workplaces and they can be filled with plasters and ampoules of eyewash in a variety of mixes to meet the needs of every work situation.

### QUICKFIX DISPENSER

The classic green QuickFix dispenser contains two refills of QuickFix plasters and/or QuickRinse eyewash ampoules. The green cap protects the content of the dispenser from dust and dirt from the workplace. It is designed with an inside shelf for smaller objects and it can be secured with lock and key.

The dispenser can be used in any location with risk of injuries and scratches. The dispenser is designed for mounting on any stationary workplace.

Dimensions: h: 135 x w: 230 x d: 32 mm

### QUICKFIX UNO DISPENSER

For workplaces that are not challenged with dust and dirt, we have developed the QuickFix UNO plaster dispenser. It is a small and modern dispenser in a unique design that combines workplace safety with modern style.

The dispenser contains 1 refill of QuickFix plasters or QuickRinse eyewash ampoules.

QuickFix UNO is available with a glossy white or a transparent cover.

Dimensions: h: 85 x w: 130 x d: 35 mm

# Choose your QuickFix plaster dispenser

- to meet your specific needs

**QUICKFIX WATER RESISTANT**  
Dispenser with 90 water resistant plasters suitable for environments with a high level of humidity.

**Packaging:** 10  
**Article no:** 5501  
**Refill article no:** 5511

**QUICKFIX ELASTIC & WATER RESISTANT**  
Dispenser with 45 elastic plasters and 45 water resistant plasters.

**Packaging:** 10  
**Article no:** 5507  
**Refill article no:** 5512 & 5511

# QuickFix plaster refills

## Full overview of refill solutions

### QUICKFIX ELASTIC REFILL

45 elastic and comfortable textile plasters that adjust to the movements of the skin. The plasters are skin-friendly and allow the skin to breathe.

#### REFILL

**Display carton:** 6 x 45  
**Packaging:** 8 x 6 x 45  
**Article no:** 5512  
**Dimensions:** l: 72 x w: 25 mm

#### DISPENSER

**Article no:** 5502

### QUICKFIX DETECTABLE REFILL

45 blue conspicuous plasters with a built-in metal foil that can be traced by a metal detector. Particularly suitable for the food industry. The plasters are made from a breathable material.

#### REFILL

**Display carton:** 6 x 45  
**Packaging:** 8 x 6 x 45  
**Article no:** 5513  
**Dimensions:** l: 72 x w: 25 mm

#### DISPENSER

**Article no:** 5503

### QUICKFIX WATER RESISTANT REFILL

45 water resistant plasters that are particularly suitable for working environments with a high level of humidity. The plasters are made from a protective PE material.

#### REFILL

**Display carton:** 6 x 45  
**Packaging:** 8 x 6 x 45  
**Article no:** 5511  
**Dimensions:** l: 72 x w: 25 mm

#### DISPENSER

**Article no:** 5501

### QUICKFIX LONG ELASTIC AND DETECTABLE

30 plasters with extra length that can be wrapped around the finger several times. Choose between elastic textile plasters or blue detectable plasters.

#### ELASTIC LONG REFILL

**Display carton:** 6 x 30  
**Packaging:** 8 x 6 x 30  
**Article no:** 5508  
**Dimensions:** l: 120 x w: 20 mm

#### DISPENSER

**Article no:** 5528

#### DETECTABLE LONG REFILL

**Display carton:** 6 x 30  
**Packaging:** 8 x 6 x 30  
**Article no:** 5509  
**Dimensions:** l: 120 x w: 20 mm

#### DISPENSER

**Article no:** 5529

**QUICKFIX ALOE VERA REFILL**

The aloe vera contained in the pad has well known soothing, moisturizing and calming properties. It creates the best conditions for the wound environment helping the natural healing process. Prevents the formation of scabs.

**REFILL**

**Display carton:** 6 x 45  
**Packaging:** 8 x 6 x 45  
**Article no:** 5514  
**Dimensions:** l: 72 x w: 25 mm

**DISPENSER**

**Article no:** 5506

**QUICKFIX ALU REFILL**

Plaster with micronized aluminum pad. The anti-adhering layer in aluminum and PE has a higher anti-adhering performance compared to a standard PE layer. The plaster is air-permeable and comfortable.

**REFILL**

**Display carton:** 6 x 45  
**Packaging:** 8 x 6 x 45  
**Article no:** 5515  
**Dimensions:** l: 72 x w: 25 mm

**DISPENSER**

**Article no:** 5505

**QUICKFIX BLOOD STOPPER REFILL**

Plasters with hemostatic effect. The presence of alginate fibres between the nonwoven fibres of the wound pad creates an artificial clot (gel) inside the pad, which blocks the bleeding in 1-2 minutes and maintains optimal moist conditions.

**REFILL**

**Display carton:** 6 x 45  
**Packaging:** 8 x 6 x 45  
**Article no:** 5516

**Content:** 5 x 20 ml  
**Packaging:** 4 x 5 x 20 ml  
**Article no:** 5160

# QuickSafe® gives you quick, easy and safe first aid

A flexible solution that gives a quick overview of the available first aid - and makes it easy to always have the right products in the right place

---

## CUSTOMIZED FIRST AID STATIONS

Fill your first aid station according to your needs. Eyewash for rinsing foreign bodies from the eye. Plum pH Neutral for accidents with acids or alkali. Plasters that are suitable for your work situation. Burn gel that soothes minor burns. Eyewash ampoules for minor accidents and irritated eyes. Wipes for cleansing wounds. Compress dressings for more serious accidents.

All of it behind a transparent cover that will give you a perfect overview of what you need.

## ” GET THE MOST IMPORTANT ITEMS IN THE RIGHT PLACE

Spæncom A/S is a leading supplier of concrete elements. The company has chosen Plum Quicksafe® in order to increase safety for their more than 500 employees. “We have chosen Plum Quicksafe®, because the station can be organized to suit the individual work area. In the areas where concrete elements are acid-washed, we can, for example, place Plum Eyewash and Plum pH Neutral DUO close to the work situation. QuickSafe® contains the most necessary items, it can be placed so that first aid is close at hand, and it is very practical with the transparent cover.”

Jany Johannsen,  
Environment and Safety Coordinator

## QuickSafe® EMPTY

### YOU MAKE THE DECISIONS

If you want full freedom to organize your first aid according to your requirements, you can start with an empty station and fill it to suit your specific situation.

### BUY AN EMPTY STATION AND FILL IT TO MEET YOUR NEEDS

If you have requirements that we do not meet with the 4 different QuickSafe® solutions presented on the following page, you can get a 100% customized solution. Start with a wall station and fill it with eye-wash bottles and other first aid products.

**Packaging:** 1  
**Article no:** 5173  
**Dimensions:** h: 430 x w: 253 x d: 92 mm

The eyewash plan is included in all QuickSafe® stations

# Help is at hand

Easy access to first aid is the key to increased safety

QuickSafe® collects the most important first aid products in one place. Position the station close to where the products are most likely to be used. The station does not take up much more room than an A3 sheet of paper, which means you can place your QuickSafe® exactly where it is needed.

The transparent cover gives you an overview and provides quick and easy access to first aid. You can easily see when the station needs a refill, and the dust-proof cover together with the separately packed products make QuickSafe® both a hygienic and an elegant solution.

## QuickSafe® BASIC

### A GOOD STARTING POINT

With a QuickSafe® Basic you get the most essential products and can choose the contents for the top shelves. It gives you full flexibility.

### DO YOU HAVE SPECIAL REQUIREMENTS REGARDING YOUR FIRST AID STATION?

The backbone of the entire QuickSafe® series is Plum's acclaimed eyewash. With QuickSafe® Basic you will get it in a combination with Plum pH Neutral, eyewash ampoules and plasters. The rest is up to you. Organize the shelf in the station to suit your company's requirements.

## QuickSafe® CHEMICAL INDUSTRY

### STRONG SOLUTION FOR TOUGH ENVIRONMENTS

Accidents with acids/alkali can have serious and life-long consequences for the individual if you compromise on accessibility.

### WHEN ONLY SECONDS STAND BETWEEN A MINOR AND A MAJOR ACCIDENT

If there is a risk of accidents involving acids or alkali, safety in the form of effective and mobile eyewash is crucial. It contains, among other things, Plum pH Neutral DUO that will rinse both eyes at the same time.

CONTENTS:	Article no:
1 x 500 ml Plum Eyewash DUO	4861
1 x 500 ml Plum pH Neutral DUO	4801
